Company Overview

Reikanne Health Consulting is a multidisciplinary healthcare and research consulting firm committed to improving systems, empowering professionals, and supporting organizations with evidence-based solutions.

The company is founded by an experienced healthcare professional, lecturer, and researcher who combines clinical expertise, expertise, academic excellence, digital transformation and real-world consulting experience. Reikanne Health Consulting stands apart by prioritizing skill transfer, ethical support, and realistic, human-centered recommendations.

Mission Statement

We empower **healthcare institutions** and **multidisciplinary professionals** by translating research into practical solutions that improve systems, strengthen teams, advance patient care, and improve public health.

We achieve this through:

- **Rigorous, ethical research that informs better decisions.**
- **Strategic consultancy that builds capacity and efficiency.**
- **Training and mentorship that support professional growth and service excellence.**

Vision Statement

A future where healthcare organizations are guided by insight, research, and compassion – creating environments where both **public** and **professionals** thrive.

Our Key Focus Areas:

- **Research Services**
- **Consultancy Services (Clinical Application & Occupational Wellness)**

We engage with your team, walk through your workplace, identify the real issues and suggest practical, sustainable improvements – not just reports.

Core Values

Integrity:

We work with honesty, accountability, and respect in everything we do.

Empowerment:

We uplift individuals and institutions through knowledge and skill development.

Ethics in Research:

We uphold the highest standards of transparency, objectivity, and confidentiality.

Excellence:

We are driven by quality, precision, and continuous learning.

Market Positioning & Share

Reikanne Health Consulting enters a strategic and growing market where the need for:

- **ethical research support,**
- **digital health and clinical application consultancy, and**
- **occupational wellness and environmental health advisory**

continues to rise across South Africa.

Although newly registered, the company's foundation lies in years of academic and clinical experience. This positions the firm to capture a unique niche in the market — one focused on quality mentorship, context-driven consulting, and evidence-based decision-making.

The market sectors served include universities, healthcare institutions, corporates, NGOs, and government entities requiring specialized expertise not widely available in traditional consulting companies.

Target Audience / Clients

Reikanne Health Consulting serves a diverse portfolio of clients, including:

Academic Sector

- University students (Honours, Masters, PhD)
- Academic departments & faculties
- Research centers & institutes

Academic Sector

- Public and private hospitals
- Clinics
- Medical device companies
- Digital health solution providers

Corporate & Industrial Sector

- Mines
- Manufacturing facilities
- Logistics & warehousing companies
- Corporations establishing or upgrading wellness programs

Government & Non-Profit Sector

- Municipal environmental health departments
- Health NGOs
- Community-based organizations

Why Choose Us

Ethical Research Support:

No ghostwriting. We mentor, guide, and empower — ensuring clients understand their own work.

Real Clinical and Academic Expertise:

Proven experience in nursing, public health, lecturing, qualitative research, and clinical application.

Immersive Consulting Approach:

We observe, analyze, and engage on-site to produce realistic, tailored solutions.

Dual Specialization:

Offering both research capacity-building and clinical/occupational consultancy.

Human-Centered Solutions:

Recommendations are not generic or AI-based; they are practical, situational, and sustainable.

Commitment to Growth:

Expanding the occupational wellness division through formal certification.

How We Work

1. Initial Consultation (Discovery)

We begin by understanding your challenges, goals, environment, and expectations.

2. Assessment / Review

This may include:

- On-site clinical or workplace evaluations
- Research material review
- Data assessment
- Digital health readiness checks

3. Analysis & Recommendations

We provide evidence-based insights grounded in academic and clinical experience.

4. Skill Transfer or Advisory Sessions

Clients receive personalized mentorship, training, or strategic consulting.

5. Implementation Support (Optional)

We guide clients in applying solutions such as research improvements, workflow changes, or wellness program setup.

6. Follow-Up

We check on progress, refine strategies, and ensure sustainability.

Our Services

01: RESEARCH SERVICES

Reikanne Health Consulting offers ethical, empowering research support designed to build long-term capacity and academic confidence.

Our Research Services Include:

Research Skill Transfer Sessions:

Guiding students and professionals through proposals, protocols, and supervisor feedback.

Qualitative Data Analysis & Co-Coding:

Independent or collaborative coding, data interpretation, and code validation.

Research Assistant Support:

Providing trained assistants for data collection and project support.

Institutional Research Consulting:

Helping universities, faculties, and companies establish or strengthen research units.

Manuscript Support:

Providing guidance for preparing, refining, and understanding manuscripts for publication.

OUR CONSULTING PHILOSOPHY

At Reikanne Health Consulting, we believe good consulting happens when we listen, observe and collaborate. We don't simply deliver a report and leave. We partner with you. We join your team. Together we build real, lasting progress.

02: CONSULTANCY SERVICES

A. Clinical Application Specialist Consultancy

Focused on digital health integration, patient monitoring systems, and clinical workflow assessment. Service Includes:

- Pre-installation site visits
- Patient journey mapping
- Clinical workflow evaluation
- Device readiness and advisory
- Training support (when requested)

B. Occupational & Environmental Wellness Consultancy

Supporting organizations in promoting health, safety, and environmental compliance. These includes:

- Workplace wellness assessments
- Occupational health and safety consulting
- Environmental health evaluations (water, sanitation, hygiene, waste)
- Advisory on setting up workplace wellness clinics

Message from the CEO

At Reikanne Health Consulting, our work is driven by a deep commitment to ethical practice, meaningful impact, and the empowerment of every client we serve.

We believe that true progress happens when people are equipped with the right knowledge, the right support, and practical guidance grounded in real experience.

Our goal is simple: to help healthcare organizations work smarter, lead better, and create lasting change. We strengthen systems, train teams, and turn data into action.

Our work is grounded in research and built for real-world impact.

Whether we are supporting a student through the research process, advising a hospital on digital health readiness, or helping a company strengthen its workplace wellness, we approach every project with integrity, professionalism, and care.

Thank you for trusting Reikanne Health Consulting. We look forward to partnering with you in building healthier systems, informed research, and safer work environments.
